PROFILE

Mission-driven technologist and AI educator focused on closing the digital equity gap in underserved communities across Chicago's south suburbs. Founder of **The Plug AI** — a community-first initiative equipping everyday people, community leaders, and organizations with practical AI skills. Combines hands-on community engagement and healthcare consulting experience with AI agent development (Claude API, multi-agent pipelines). U.S. Army veteran. Merit America alum.

EXPERIENCE

Community Engagement Specialist & Personal Healthcare Consultant

2025 – Present

[BigHeart Health](#)

Chicago, IL

- Advised community members and patients on healthcare navigation, digital health literacy, and access to care resources
- Created community outreach materials and QR code engagement campaigns for health-underserved populations, including church and community-center partnerships
- Designed provider booking workflows and managed content calendar for healthcare partner engagement
- Built and deployed AI-powered content tools to convert healthcare education topics into multi-platform outreach campaigns
- Tracked outreach-to-enrollment impact to measure community engagement effectiveness

Founder

2025 – Present

[The Plug AI \(own business\)](#)

Chicago South Suburbs, IL

- Built and launched a community-first AI literacy program serving underserved residents across Chicago's south suburban communities
- Developed full digital literacy curriculum covering AI tools, prompt engineering, and practical automation for non-technical learners
- Engineered a multi-agent content pipeline (Claude API + Supabase) that generates platform-ready social media content for Instagram, TikTok, Facebook, and YouTube Shorts
- Designed onboarding flows, intake routing agents, and enrollment funnel automation to scale community reach without additional headcount
- Secured partnership conversations with BigHeart Health to deliver AI-assisted healthcare navigation education
